ESTABLISHMENT TRY TO STOP INVENTOR FROM EXPOSING SPEED CAMERA SCAM

From Idris Francis 25/05/2005 updated march 2008

David Edgar (of NOTSO) arrested

David Edgar, an inventor, has established that GATSO speed cameras are unreliable because of unacceptable (and adjustable!) variations in the time between the two flashes and photographs. There is increasing evidence that we are heading for a Police State. The GATSO system uses a series of doppler shifted radar reflections to measure any vehicles speed. The vehicle ID (plate etc) is confirmed by double flash photography which coincidentally confirms the vehicle speed by distance travelled in a set time interval across the calibration marks on the road. Increasing this time interval will exaggerate the speed! The GATSO allows adjustment of this interval WHY!

3 pictures of the Arresting officers are attached

These are two West Midlands police officers, their identity is unknown because West Midlands police refuse to name them, this is despite a formal complaint to the Chief Constable and the **Independent Police Complaints Commission**.

These two individuals kicked down the front door of David Edgar's home whilst he was recovering from a heart attack and then handcuffed him and dragged him across the floor of his living room despite being told that he was unwell and was suffering chest pains.

The two officers then ignored Mr. Edgar's pleas for his medication and then dropped him so violently to the ground that he was rendered unconscious.

The two officers claimed they had a Warrant for Mr. Edgar's arrest however they failed to produce it, they then refused to examine the medical evidence Mr. Edgar had, proving his medical conditions, refused to give him his medication then refused to call medical assistance.

Having knocked Mr. Edgar unconscious the police officers then dragged him to their waiting police car where they then bundled him into the back of the car causing him injuries then and whilst on route to the police station Mr. Edgar stopped breathing and they then had to rush him to the local hospital where he was treated for an angina attack.

Having formally complained to The Chief Constable of West Midlands Police Mr. Edgar was then ignored therefore he made a formal complaint to the Independent Police Complaints Commission, this was also ignored therefore Mr. Edgar then attempted to commence legal proceedings against the police but was refused by the Courts.

Mr. Edgar has now taken his case along with this video evidence to the European Court of Human Rights in Strasburg, in addition the PM has been informed.

The PPP comments this disgusting treatment of an infirm and elderly man by two uniformed thugs masquerading as Police officers occurred in 2005 and is frightening. David was unable to complete his exposure of an apparent major corruption of the use of fixed speed cameras. We know from our experience in North Wales how similar corruption of mobile camera operations is common and probably encouraged by the partnership's members. We believe that, sadly, David Edgar is deceased and this event may well have contributed to his eventual death. We also remember the strange and still unexplained death of Dr David Kelly who also rocked the boat!

The reality or otherwise of what David Edgar's experiments found is still a mystery and the deliberate persecution of all drivers of all classes of vehicle by blind technology and a corrupt legal system continues day and night ad infinitum!
