Scientists abandon global warming 'lie' Posted by WorldNetDaily December 11, 2008

WASHINGTON – A United Nations climate change conference in Poland is about to get a surprise from **650 leading scientists** who scoff at doomsday reports of man-made global warming – labeling them variously a lie, a hoax and part of a new religion.

Later today, their voices will be heard in a U.S. Senate minority report quoting the scientists, many of whom are current and former members of the U.N.'s own Intergovernmental Panel on Climate Change.

About 250 of the scientists quoted in the report have joined the dissenting scientists in the last year alone. In fact, the total number of scientists represented in the report is 12 times the number of U.N. scientists who authored the official IPCC 2007 report.

Here are some choice excerpts from the report:

"I am a skeptic Global warming has become a new religion." -- **Nobel Prize Winner for Physics, Ivar Giaever.**

"Since I am no longer affiliated with any organization nor receiving any funding, I can speak quite frankly As a scientist I remain skeptical." -- **Atmospheric Scientist Dr. Joanne Simpson, the first woman in the world to receive a Ph.D. in meteorology** and formerly of NASA who has authored more than 190 studies and has been called "among the most pre-eminent scientists of the last 100 years."

Warming fears are the *"worst scientific scandal in the history When people come to know what the truth is, they will feel deceived by science and scientists."* -- **U.N. IPCC Japanese Scientist Dr. Kiminori Itoh**, an award-winning Ph.D. environmental physical chemist.

"The IPCC has actually become a closed circuit; it doesn't listen to others. It doesn't have open minds I am really amazed that the Nobel Peace Prize has been given on scientifically incorrect conclusions by people who are not geologists." -- **Indian geologist Dr. Arun D. Ahluwalia at Punjab University** and a board member of the U.N.-supported International Year of the Planet.

"The models and forecasts of the U.N. IPCC "are incorrect because they only are based on mathematical models and presented results at scenarios that do not include, for example, solar activity." -- **Victor Manuel Velasco Herrera**, a researcher at the Institute of Geophysics of the National Autonomous University of Mexico.

"It is a blatant lie put forth in the media that makes it seem there is only a fringe of scientists who don't buy into anthropogenic global warming." -- **U.S. Government Atmospheric Scientist Stanley B. Goldenberg** of the Hurricane Research Division of NOAA, the National Oceanic and Atmospheric Administration.

"Even doubling or tripling the amount of carbon dioxide will virtually have little impact, as water vapor and water condensed on particles as clouds dominate the worldwide scene and always will." -- **Geoffrey G. Duffy, a professor in the Department of Chemical and Materials Engineering of the University of Auckland**, New Zealand.

"After reading [U.N. IPCC chairman] Pachauri's asinine comment [comparing skeptics to] Flat Earthers, it's hard to remain quiet." -- **Climate statistician Dr. William M. Briggs**, who specializes in the statistics of forecast evaluation, serves on the American Meteorological Society's Probability and Statistics Committee and is an associate editor of Monthly Weather Review.

"For how many years must the planet cool before we begin to understand that the planet is not warming? For how many years must cooling go on?" -- Geologist Dr. David Gee, the chairman of the science committee of the 2008 International Geological Congress who has authored 130 plus peer-reviewed papers, and is currently at Uppsala University in Sweden.

"Gore prompted me to start delving into the science again and I quickly found myself solidly in the skeptic camp Climate models can at best be useful for explaining climate changes after the fact." -- Meteorologist Hajo Smit of Holland, who reversed his belief in man-made warming to become a skeptic, is a former member of the Dutch U.N. IPCC committee.

"Many [scientists] are now searching for a way to back out quietly (from promoting warming fears), without having their professional careers ruined." -- Atmospheric physicist James A. Peden, formerly of the Space Research and Coordination Center in Pittsburgh, Pa.

"Creating an ideology pegged to carbon dioxide is a dangerous nonsense The present alarm on climate change is an instrument of social control, a pretext for major businesses and political battle. It became an ideology, which is concerning." -- Environmental Scientist Professor Delgado Domingos of Portugal, the founder of the Numerical Weather Forecast group, has more than 150 published articles.

"CO2 emissions make absolutely no difference one way or another Every scientist knows this, but it doesn't pay to say so Global warming, as a political vehicle, keeps Europeans in the driver's seat and developing nations walking barefoot." -- Dr. Takeda Kunihiko, vice-chancellor of the Institute of Science and Technology Research at Chubu University in Japan.

"The [global warming] scaremongering has its justification in the fact that it is something that generates funds." -- Award-winning Paleontologist Dr. Eduardo Tonni, of the Committee for Scientific Research in Buenos Aires and head of the Paleontology Department at the University of La Plata.

The report also includes new peer-reviewed scientific studies and analyses refuting man-made warming fears and all climate developments that contradict the theory.

The PPP comments ... We paste this story on our website because the Global Warming Lie is used by the anti-vehicle lobby to campaign for cycle lanes, lower speed limits and many other restrictions which we don't need and can't afford. North Wales police use it as an excuse to employ staff to reduce their 'carbon foot print' wasting the resources and funds needed for REAL policing. They even appear to believe that 100% of their electrical energy comes from wind farms! Perhaps they didn't notice they still had power when, during the recent cold spell, the wind speed across the west of the UK was too low for wind generators to produce anything at all!

The GW LIE is very bad science supporting even worse political decisions. REDUCING fuel consumption and waste of any sort is commendable. To achieve this we need sound management making valued judgements based on high quality engineering and science. Which leaves most politicians out of the loop.

Politicians seek to convince us that if we accept huge tax rises, energy rationing and restrictions on freedom to travel where we please, they will control the temperature of the planet! Yes folks, that is what they want you to believe!
