### MOBILE PHONE BEATS MOBILE CAMERA

Inventor wins speed camera battle & court drops speeding charges

<http://news.bbc.co.uk/1/hi/england/wear/7033353.stm>

Magistrates were stunned when a scientist charged with speeding at 42mph told them: "No I wasn't . . . I was only doing 29.177196mph."

**Dr Phillip Tann's** lawyer then produced data from a revolutionary device he was testing – showing the exact time, location and speed of his car. Instead of being 12mph over the limit when his Mercedes was zapped by a mobile speed camera, he was actually less than 0.8mph UNDER. The case has now been dropped. **A local resident advised that the toad was regularly monitored by speed cameras BUT it is unadopted!**

**Dr Tann plans to talk to police chiefs about how his invention – built into a mobile phone – could help stop speeders.**

The boffin, 45, who runs his own technology firm, was stunned to get a letter accusing him of speeding in Sunderland because he had seen the police trap.

He checked data on the device and found cops were wrong. His lawyer gave the city's JPs a CD of his recordings.

Dr Tann said that police cameras are not 100 per cent accurate but that his system is. **Dr Tann's company <http://www.vbay.eu/peoplesmap.htm> has received £60,000 from a Government funded equity investment company!! .... Who are At <http://www.northstarei.com/>**

The following websites provide info. on similar technology

<http://www.gpsauto.nepsin.com/>

**The PPP comments ... the development of a war between the motorist with camera locators/detectors and GPS speed recorders and the Police with more sophisticated cameras hidden or otherwise is not the way to improve our road safety culture. Whatever technology the polices are given they tend to abuse/misuse it. Speed cameras abuse is way beyond what is acceptable in a free society and amounts to a conspiracy to pervert the course of justice ... we are not surprised considering that the prime author of the guidelines and instigator of the system was Brunstrom!!**
