A MANIFESTO ON THE REFORM OF PARKING AND TRAFFIC ENFORCEMENT

<http://www.motoristslegalchallenge.co.uk/docs/ManifestoMainWebCopy.pdf>

The PPP comments ... this manifesto deals with another aspect of the war against the motorist. We support the principle because of our core belief in SENSE and REASON. We have all been victims of the abusive system described here and these people are campaigning on our behalf. The war is against the majority who attempt to conduct their business in our towns and cities throughout the UK. Even today the opposition claims that they will support businesses in town centres against the might of the supermarkets.

The councils who run the towns and milk the businesses by taxation deter us and penalise us at every opportunity for entering their domain. Whilst the supermarkets provide excellent parking and other facilities because it makes good business and cost effective sense.
